DISCOVER THE BENEFITS OF THE AMBU NEUROLOGY PORTFOLIO

Explore the details, features and advantages of a wide range of quality single-use patient monitoring and diagnostics products for diverse procedures and patient types.

EMG

The right balance of efficiency and patient comfort

For the busy neurology clinic that treats people of all ages, our EMG portfolio helps you work efficiently without compromising on patient needs. A wide array of needles and surface electrode types and sizes ensures that you have the tools you prefer for the best possible examination. A choice of EMG needles designed for patient comfort enables you to work fast and accurately.

EEG

Enhance your departmental efficiency

For the neurology department staff who take pride in a fast and efficient diagnosis, our EEG portfolio enables you to deliver according to your local protocol. And you don't have to worry about cross-contamination or cleaning after use. A broad selection of single-use electrodes with stable and consistent signal quality enables you to meet a variety of patient types and EEG applications efficiently.

IOM

Professional support in the operating room

For neurologists who expect nothing to get in the way of important clinical decisions, our IOM portfolio provides a range of products designed to meet the specifics of the neurophysiological applications in the operating room.

GUIDED INJECTIONS

Reliable for neurologists and patients alike

For the neurologist who views patient comfort as a must, our guided injection needles are developed to help make your workday smooth, while providing a positive experience for your patient. The right balance of sharpness, rigidity and flexibility contributes to both efficiency and patient welfare.

EEG / EP / PSG

FEATURES

- Silver/Silver chloride sensor ensures stable signal quality
- Pre-attached, flexible and color-coded lead wires for easy identification
- Can be used with conductive gels, pastes and adhesives

Ambu® Neuroline™ Cup electrode is single-patient use to minimize the risk of bacterial cross-contamination and to enhance departmental efficiency.

The cup electrodes are available in a variety of patient-ready packaging configurations.

FEATURES

- Ambu® Neuroline™ 700 and 710 are repositionable, self-adhesive, solid gel electrodes with minimum skin irritation. Offered in two sizes: 20x15 mm and 28x20 mm
- Ambu® Neuroline™ 720 is a strong adhesive, wet gel electrode offered as a wired or non-wired solution

EMG/NCS - CONCENTRIC

Ambu® Neuroline™ Concentric is designed to obtain and transfer signals reliably during EMG procedures.

The needle tip cut is designed with a small angle to reduce pain for the patient.

The needle stays sharp after repositioning.

Use a ground electrode to complement the needle electrode in the procedure.

FEATURES

- Silver sensor for suitable impedance level
- Silicone coating reduces friction when inserting and moving the needle in the target area
- Color-coded hub with precision grip to assist the identification of needle size

EMG/NCS - MONOPOLAR

Ambu® Neuroline™ Monopolar features a needle tip designed to reduce the penetration force.

Use a reference electrode and a ground electrode to complement the needle in the procedure.

Ambu surface electrodes for nerve conduction study are offered in various styles and sizes to suit the specific needs of the procedure.

FEATURES

- The needle tip cut is designed to reduce the penetration force
- Silicone coating reduces friction when inserting and moving the needle in the target area
- Available with or without a pre-attached lead wire

FEATURES

- Ambu® Neuroline™ 700 and 710 are repositionable, self-adhesive, solid gel electrodes with minimum skin irritation. Offered in two sizes: 20x15 mm and 28x20 mm
- Ambu® Neuroline™ Ground (714) is a 48x30 mm repositionable, self-adhesive, solid gel electrode. It offers a convenient release tab for removal of the electrode
- Ambu® Neuroline™ 715 is a 30x22 mm self-adhesive electrode with skin-friendly solid gel. The electrode is repositionable and has a transparent backing for visually guided placement

EMG - GUIDED INJECTIONS

Ambu® Neuroline™ Inject gives you the reliability you need for the injection of Botulinum Toxin.

The needle tip cut is designed with a small angle to reduce the penetration force, while providing a sufficient sensor area for a suitable impedance level.

Use ground electrodes and reference electrodes as needed to complement the needle in the procedure.

FEATURES

- Ambu® Neuroline™ 700 and 710 are repositionable, self-adhesive, solid gel electrodes with minimum skin irritation. Offered in two sizes: 20x15 mm and 28x20 mm
- Ambu® Neuroline™ Ground (714) is a 48x30 mm repositionable, self-adhesive solid gel electrode. It offers a convenient release tab for removal of the electrode
- Ambu® Neuroline™ 715 is a 30x22 mm self-adhesive electrode with skin-friendly solid gel. The electrode is repositionable and has a transparent backing for visually guided placement

FEATURES

- Silicone coating reduces friction when inserting and moving the needle in the target area
- Compatible with a Luer-Lock fitting to provide a secure syringe connection
- Color-coded hub with precision grip to assist the identification of needle size

Surface Electrodes	Ambu® Neuroline™ 700									20x15 mm (LxW)	Silver/Silver chloride	K, J, SC connectors	Repositionable, self-adhesive, solid gel electrode Flexible, comfortable, soft and breathable backing material
Surface Electrodes	Ambu® Neuroline™ 710									28x20 mm (LxW)	Silver/Silver chloride	K, J, SC connectors	Repositionable, self-adhesive, solid gel electrode Flexible, comfortable, soft and breathable backing material
Surface Electrodes	Ambu® Neuroline™ 715									30x22 mm (LxW)	Silver/Silver chloride	K-connector	Repositionable, self-adhesive, skin-friendly, solid gel Transparent backing to guide placement on target area
Surface Electrodes	Ambu® Neuroline™ Ground (714)									48x30 mm (LxW)	Silver/Silver chloride	M-connector	Repositionable, self-adhesive, solid gel electrode Flexible, comfortable, soft and breathable backing material

WE ACKNOWLEDGE OUR ENVIRONMENTAL RESPONSIBILITY

FOCUS ON HIGH IMPACT AREAS

Ambu’s primary goal is to deliver innovative devices that help healthcare professionals improve patient care and save lives. At the same time, we are acutely aware of our responsibility towards the planet on which we all live. Therefore, as we work towards long-term sustainability goals, we focus on the areas where we believe we can make a difference. We take practical actions throughout the life cycle of our products from design to production and disposal after end-of-use. Furthermore, to ensure that we are accountable and make concrete progress, we have formalized our commitments, documented our efforts and aligned measurements across our global locations.

As a signatory to the UN Global Compact, Ambu supports its ten principles for human rights, labour rights, the environment and anti-corruption, and we contribute to the UN Sustainable Development Goals (SDGs).

Our main contributions in the area of environment relate to the following four SDGs:

OVERALL TARGETS

95% of new products released after 2025 to be **PVC-free**

ON TRACK

100% **recyclable, reusable or compostable** packaging applied by 2025

ON TRACK

Work towards reducing our **carbon emissions** by 50% by 2025, compared to 2019 baseline

ON TRACK

FOCUS AREAS WITHIN PRODUCT AND DESIGN

HEALTHY SUBSTANCES

Reduce the use of chemicals in our choice of materials in order to avoid exposure to substances of concern and enable safe circulation.

CIRCULAR PACKAGING AND LOGISTICS

Rethink packaging and the way we ship out products from suppliers to customers and beyond the end of the product life cycle.

MATERIALS INNOVATION

Rethink the way we enable circulation of our parts and products with materials, such as bioplastics and recyclates.

MANUFACTURING CASCADES

Reduce and recirculate materials, energy and water from the side streams of our processes to make more from less through cascaded use.

CIRCULAR PRODUCT DESIGN

Redefine the product structure to keep the materials at the highest possible value at all times, enabling circularity by design.

SYSTEM INNOVATION

Reconfigure health and waste systems through pilots and partnerships to achieve actual take-back and recycling in key regional markets.

Ambu medical devices inherently contribute to good health and well-being. With this in mind, we continually evaluate the substances used to improve product performance and consider if and how they affect human health and the environment. The completion of the phasing out of harmful phthalates in our products produced since 2019/20 is an example of our long-term efforts in this area.

We contribute to responsible consumption and production by monitoring and reducing our energy and water consumption, minimising waste and focusing on sustainable procurement.

Through our energy efficiency activities and our engagement with the Science Based Targets initiative, we will increase our use of renewable electricity and thereby combat climate change and support affordable and clean energy.

A HISTORY OF BREAKTHROUGH IDEAS

Ambu has been bringing the solutions of the future to life since 1937. Today, millions of patients and healthcare professionals worldwide depend on the efficiency, safety and performance of our single-use endoscopy, anaesthesia, and patient monitoring & diagnostics solutions.

The manifestations of our efforts have ranged from early innovations like the Ambu® Bag™ resuscitator and the Ambu® BlueSensor™ electrodes to our newest landmark solutions like the Ambu® aScope™ - the world's first single-use flexible endoscope. Moreover, we continuously look to the future with a commitment to deliver innovative quality products that have a positive impact on your work.

Headquartered near Copenhagen in Denmark, Ambu employs approximately 4500+ people in Europe, North America and the Asia Pacific.

Ambu takes environmental issues seriously

Some of the greenest companies in the world are based in Denmark, and Ambu is inspired by this tradition.

Ambu environmental targets by 2025: All packaging will be recyclable, reusable or compostable; 50% reduction of carbon emissions compared to 2019 baseline; 95% PVC-free for products released after 2025.
