

## Ambu Extends Major US Contracts

Three nation-wide contracts that run from 2019 to 2022-2023 and ensure delivery of lifesaving devices to hospitals and emergency services.

Ambu is pleased to announce an agreement with HealthTrust Purchasing Group (HPG) to extend the National Dual Award Resuscitation and Hyperinflation Agreement for a five-year term. Under a five-year contract that began January 1, 2019, Ambu is one of two contracted suppliers for HPG members for the category of Resuscitation and Hyperinflation Bags. For the first time, HPG Members also have the option of a deeper partnership with Ambu via a committed tier that is available for this five-year term.

The dual award of the HPG Resuscitation and Hyperinflation contract reinforces Ambu's position as the market leader in this category. *"At Ambu, we are immensely proud to be a preferred supplier of lifesaving devices. The Ambu bag resuscitator was a revolution in first aid when we invented it in 1956, and – through subtle innovations and improvements during the years – it continues to be a crucial piece of equipment in modern health care,"* says Lars Marcher, CEO of Ambu.

In addition, Ambu announces an agreement with HPG to extend the Sole Award Agreement for a four-year term. Under a four-year contract that began February 1, 2019, Ambu is the sole supplier for HPG members for the category of Anesthesia Breathing Circuits and Face masks. *"It's absolutely crucial for doctors, nurses and paramedics to have easy access to high quality devices. We're proud that HPG has seen fit to extend our exclusive contract on anesthesia products for four more years making it possible for us to contribute to saving lives and improving patient care,"* says Lars Marcher.

### The Original Ambu Resuscitator

Since 1956 when they introduced the first manual resuscitator to the market, Ambu has been the global leader in providing resuscitation solutions to healthcare providers. Featuring the SPUR II disposable resuscitator, Ambu offers a comprehensive portfolio of products which also includes reusable resuscitators, hyperinflation systems, a number of innovative anesthesia circuits and face masks. With a focus not only on patient care but also ease of use, the "Ambu bag" has been the resuscitator of choice for generations of clinicians, helping to save patients' lives for over six decades and counting.

**About Ambu**

Since 1937, breakthrough ideas have fuelled our work on bringing efficient healthcare solutions to life. This is what we create within our fields of excellence – Visualisation, Anaesthesia, and Patient Monitoring & Diagnostics. Millions of patients and healthcare professionals worldwide depend on the functionality and performance of our products. We are dedicated to improve patient safety and determined to advance single-use devices. The manifestations of our efforts range from early inventions like the Ambu Bag™ resuscitator and the legendary BlueSensor™ electrodes to our newest landmark solutions like the Ambu® aScope™ – the world's first single-use flexible endoscope. Our commitment to bringing new ideas and superior service to our customers has made Ambu one of the most recognized medtech companies in the world. Headquartered near Copenhagen in Denmark, Ambu employs approximately 2,700 people in Europe, North America and the Asia Pacific. For more information, please visit [www.ambu.com](http://www.ambu.com).
