

Ambu® Aura-i™

Key Benefits

- Built-in anatomically correct curve for fast and easy insertion
- Intubating capability using standard ET-tubes
- Reinforced tip resists folding over during insertion and plugs the upper esophageal sphincter
- Bite resistance in the connector block prevents occlusions
- Convenient depth marks for monitoring correct position
- Pilot balloon identifies mask size and provides precise tactile indication of degree of inflation
- Navigation marks for guiding flexible scope
- Color-coded packaging with directions for use
- MR safe
- Phthalate-free material

Ambu® Aura-i™

Ambu® Aura-i™ is a disposable laryngeal mask designed for everyday use. Pre-formed to follow the anatomy of the human airway, the soft rounded curve of the Aura-i ensures fast and easy placement and guarantees long-term performance.

Aura-i is the preferred everyday routine device for establishing an airway where an ET-tube is deemed unnecessary. At the same time it holds a place on the difficult airway cart.

In case of a "Cannot Intubate – Cannot mask Ventilate" (CI-CV) situation, where the end-game is to intubate the patient,

Aura-i can be used as conduit for direct endotracheal intubation assisted by a flexible scope (such as the Ambu® aScope™ 2).

The airway tube is designed to allow easy passage of an appropriately sized ET-tube.

The recommended ET-tube size is indicated on the connector block of the mask.

Aura-i comes in a complete range of 8 sizes, suitable for infants, pediatrics and adults.

Specifications

	Infant		Pediatric		Adult			
	#1	#1½	#2	#2½	#3	#4	#5	#6
Mask size								
Packaging color code	●	●	●	●	●	●	●	●
Patient weight	< 5 kg	5-10 kg	10-20 kg	20-30 kg	30-50 kg	50-70 kg	70-100 kg	>100 kg
Maximum cuff inflation volume	4 ml	7 ml	10 ml	14 ml	20 ml	30 ml	40 ml	50 ml
