

# aCart™ Compact

## Designed for convenience

For HCPs who perform endoscopic procedures, aCart™ Compact is a modern, mobile workstation that adds value to the Ambu single-use product portfolio. The aCart™ Compact workstation provides convenient storage and portability without taking up a lot of space.

## A modern mobile workstation

The aCart™ Compact workstation enables you to move fast when you need to respond to an emergency or change clinical environments. It is also ideal for the outpatient clinic or for doctor's offices with limited space.

## Robust and portable

The design and choice of materials make the aCart™ Compact workstation light enough to easily transport, yet robust and stable enough to protect your valuable endoscopic equipment. The hygiene of the aCart™ Compact workstation is certified by the DGKH (German Society for Hospital Hygiene).

## Everything is within reach

The aCart™ Compact workstation puts everything you need within reach with a:

- Storage hook for spare single-use endoscopes
- Basket for accessories, cables or airway tools
- Preparation tray
- Dual scope holder for single-use endoscopes that have been prepared for use and that are in use
- Monitor holder and adjustable IV pole, which the Ambu displaying and processing units can be attached to

The aCart™ Compact workstation also supports a cable organizer and cable duct for efficient cable management.

## Have questions about the aCart™ Compact workstation?

Please contact your local Ambu representative.

# aCart™ Plus

## Designed for stability and convenience

For HCPs who perform procedures in the bronchoscopy suite or other endoscopy suites, the aCart™ Plus workstation is designed for stability and convenience.

## Robust and efficient

The robust design makes the aCart™ Plus workstation durable, even with intensive use. The materials and surface finishes are high quality, and the workstation is certified by the DGKH (German Society for Hospital Hygiene). A cable organizer with two cable ducts makes cable management neat and efficient.

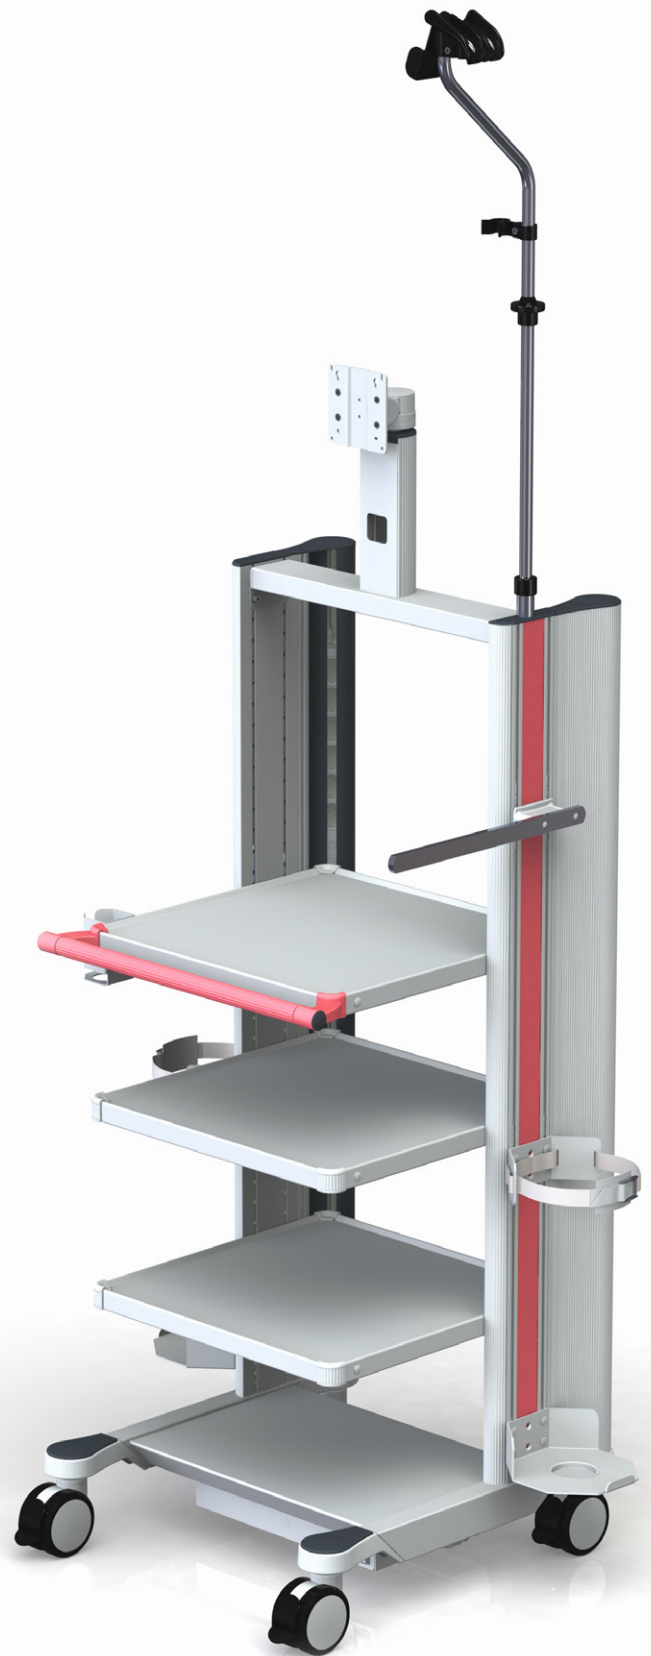

## Everything is within reach

The smart layout of the cart puts the tools you need within reach with:

- Ample shelf space for medical devices
- A medical rail for attachable accessories
- Sterile water bottle and CO<sub>2</sub> cylinder holders
- A monitor holder
- Scope holder for single-use endoscopes that have been prepared for use and that are in use

## Have questions about the aCart™ Plus workstation?
